OBJECTIVE: To secure a position in Web Development career field.

SKILLS SUMMARY: Determined, highly motivated creative mind with experience in creating solutions to solve work assignments on a deadline. Skillful in leading a group as well as supporting a group to accomplish a common goal. Diverse range of career fields, allowing for a wide range of experience to apply to a task; as well as always looking for something new to learn and become familiar with. Experienced with an ever changing work environment, as well as completing tasks will maintaining adequate regulations, codes and safety requirements.

- Construct and organize a plan to augment efficiency in completing tasks assigned while utilizing all the resources available.
- Proficient at maximizing time allotted for a given assignment as well as making sure it is done competently.
- As a pallet dock Supervisor I trained 20+ employees on the vast safety requirements to complete their job in a safe manner as well as underlying the potential dangers and hazards that accompany the job.
- Succeeding through quality work and leading by example. Able to work on a strict deadline and under pressure.
- Organization and motivation have led me to learn a variety of new trades and prosper in different career fields. Always willing to listen and take advice, as well as helping or sharing advice or an opinion.
- Implementing a work plan that keeps me one step ahead of my tasks while spending any potential downtime looking for potential advances of knowledge in order to gain an advantage over my competitors.

PROFESSIONAL EXPERIENCE

Junior Developer

Pinetop Systems

Supervisor: Dale Marshall

Jan/2018- Present

40 hours/week

Junior Developer:

- Developed the site using bootstrap and database integration with SQL server
- Built web pages using HTML, JQuery, Bootstrap, and C#
- Created user profiles in database and HTML expanding user traffic capacity
- Improved user satisfaction by boosting the efficiency of MySQL query designs, eliminating bugs and scaling back end systems to meet growing traffic requirements
- Partnered with designers to create sitemaps, improve Web page layouts and interfaces
- Prioritized and fix site-related design problems
- Implemented new features based on user feedback
- Coordinated with marketing team for the presentation of website and other marketing material

Key Accomplishments: Launch website to meet the needs of the ever-growing account management and routing solutions market.

Shipping and Receiving

Power Curbers

Supervisor: Richard Harris

Nov/2014- Present

40 hours/week

Shipping and Receiving:

- Thorough labeling, organization and continuing maintenance of all service inventory through use of SAGE mass system, accompanying physical double checking.
- Extensive experience with Starship transportation program and its tools for use in packaging and shipment of service parts.
- In Depth knowledge of various oversea requirements and stipulations depending on cargo, contents and shipment methods. (LTL freight classing, heat treated lumber, air freight regulations and commercial invoicing)
- Setup and packaging for overseas container shipments as well as construction of Bill of Lading.
- Extensive experience loading heavy equipment onto and into varying types of trailers (RGN, Stepdeck and Container) as well as proper methods in properly securing cargo for transit.

Key Accomplishments:

Learn all standards and regulations for domestic and international shipments with no initial experience. Develop extensive woodworking, machining and equipment knowledge to safely package, alter and modify shipments for proper delivery. Become proficient enough to assume the lead Shipping and Receiving role and increase productivity by streamlining daily processes. Implement new technologies, software and automation to curb setup, packaging and shipment

time.

Media Blaster

Power Curbers

Supervisor: Randy Ward

May/2014- Nov/2014

40 hours/week

Media Blaster: With this position my major priority is to ready the various machine parts for paint, in whatever manner is required. This may mean blasting the mill scale off metal with a large or small media blaster; scratching or cleaning the surface with specified tools or chemicals or the loading and unloading of parts with an overhead crane. Other responsibilities include maintaining blasting equipment, media and oxygen hoses, feed hopper to the blast booth and proper disposal of toxic waste and excess trash media. Management of wash bay tools must be kept up to specifications as well; which includes appropriately determined pH level, temperature and pressure from the power washing wand. Sanitation and cleaning is a key factor in this position which requires use of the forklift for metal and trash disposal in proper dumpsters as well as use of industrial floor scrubber vehicle.

Key Accomplishments: This position is an intensely fast paced which demands a working knowledge of each department in the building and requires very frequent need for quality assurance checks and flexibility to meet demands from other departments. Becoming well versed in this position and maintaining a very stringent schedule of parts flowing through and learning the inner workings of the surrounding departments has been my key accomplishment.

Mechanical Apprentice

September/2013

Tri-City Mechanical, Greensboro NC

hours/week

Supervisor: Carlton Custer, 336 259-0326. May be contacted

June/2013-

40

Mechanical Apprentice: As the name suggests, this position required the ability to adequately delegate my previously acquired skills and assist welders, pipe fitters, or journeyman mechanics with any mechanical or welding problem that arose. It was my responsibility to ensure that piping was at the proper specifications in accordance with blue print measurements. Safety was a huge concern in this line of work due to the nature of working in chemical plants and around incredibly dangerous liquids and gasses. Due to this ongoing hazard, it was of utmost importance to operate effectively as an individual under OSHA policies to maintain company equipment and property.

Key Accomplishments: Being the youngest employee brings about complications in and of itself, however, after several months I became an invaluable employee as I was able to perform any apprentice task. The skills attained such as learning to pipe fit, weld, as well as improving communicative proficiency has proven to be useful time and time again.

Seasonal Mechanical Apprentice

January/2014

Granite Manpower, Wilmington NC

Resource Manager: Shaun York

February 2012 –

84 hours/week

Mechanical apprentice: As a seasonal contractor with Granite Manpower it was my responsibility to assist welders, mechanics, blade technicians, and Borescope operators in any manner necessary. Main job requirements included securing large turbine parts together using industrial equipment such as cranes, utilizing general tools, and various other specialty equipment. It was also my duties to assemble, install, align, and set equipment to proper standards issued by employer.

Key Accomplishments: Ensured proper guidelines and procedures were completed in a timely and safely manner. Maintained effective communication between employer and myself in order to warrant proper assembly and maintenance.

Upheld consistent professionalism by giving full attention to others when speaking and making sure to understand the new information being presented.

The ability to think critically and make judgments on my own without prompting from others. Improving my ability to determine strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

Supervisor

January 2009-

February 2012

Rogers Unloading Service, Greensboro, NC

40 hours/week

Manager: Jeremy Gravely (704) 634 – 2889. May be contacted

Dock Supervisor: Utilizing proficiency with the computer based logistics system. Responsibilities included establishing schedules for trailer pickups and drop offs, maintaining and compiling accurate employee work schedules, and liaison between Rogers regional manager and unloaders. As the supervisor I was in charge of training my crew (varied, depending on the amount of pallets needing to be sorted and shipped out) of four up to twenty individuals, on the required safety procedures of working in this warehouse and forklift operations.

Unloader: Communicate with customers to determine appropriate unloading procedures of various tractor trailers. Using specialty equipment such as forklifts to unload and sort each trailer in accordance to a load manifest. Ability to work within a team environment is a must as each task builds upon the completion of the first stage. With little supervision needed my responsibilities were concluded with haste.

Key Accomplishments Ensured all communications were conducted in a timely and proficient manner to both customers and fellow employees. Ability to handle conflict and problem solving with ease with upholding professionalism.

Resulted in an improvement of productivity levels by maintaining a steady flow of tractor trailers in and out of the warehouse. Mastered the skills and knowledge necessary for the operation of various types forklifts and unloading equipment.
