Google Sniper 3.0 PDF is the make money online training course, by George Brown, that teaches you how to make money through affiliate marketing by creating small "sniper" sites that rank high in Google quickly.

These "sniper" sites that you will be creating are more like micro niche sites that are laser focused around one keyword and one keyword only.

Unlike traditional authority sites that target hundreds of keywords and a wide range of topics, every page, post, tweet, like, everything you do for this site will be focused on your one keyword (or synonyms of that keyword).

Google Sniper 3.0 Free Download Bonus comes complete with a 104 page step-by-step Google Sniper Manual PDF which is accompanied by video training, process maps, checklists, live Q & A webinars along with further training video series. About the Author of Google Sniper 3.0 PDF

George Brown is the creator and author of Google Sniper 3.0 PDF, George got his start in internet marketing at the age of 17 and by the time he was 18 he was already considered by many to be a super affiliate.

George released Google Sniper 3.0 at the young age of 20, and by then was already a millionaire. Google lives in the United Kingdom and runs his multi-million dollar internet marketing business full time.

George Brown claims that in 2010 alone he has made over \$500 million from his internet marketing businesses, which include his sniper sites and the sale of Google Sniper 3.0.

How Google Sniper 3.0 PDF work?

Google Sniper 3.0 Manual PDF begins with a basic explanation of Search Engine Optimization ("SEO"). Now, you may think you are already familiar with SEO, but George's take on it is very unique.

Most gurus on the Internet teach you to choose a market or niche, find moderately difficult keywords to target for your SEO efforts, and then spend months attempting to create links to your website in order to achieve first page Google ranking results.

George's method is different in that he teaches a specific formula to help you rank with very few, if any, links pointing to your websites.

After selecting your keywords, the manual includes a detailed explanation of how to set up a website that will actually result in sales and income.

Surprisingly, these sites do not require HTML knowledge or extensive web design experience.

The training in the manual walks you step-by-step through the initial processes of obtaining a domain or website, installing Word Press, getting a theme set up and publishing content and paid advertisements so that you can realize an income.

This process actually works well for beginners because, interestingly, the more basic a website looks the more it appears to be "trustworthy" when marketing products rather than a professional website that is obviously earning revenue from advertisements.

Once you determine your target keywords based off of George Brown's training in the manual and videos, and install Word Press and finish the layout, the manual discusses adding content to your website. When testing the product for this Google Sniper 3.0 Review, we found this to one of the most important steps short of actually choosing profitable keywords. The reason the content is so vital to the course is because George Brown successfully ranks websites using largely on-page SEO. Now, many gurus will tell you that backlinks are far more powerful than on-page SEO factors, but they would be wrong based on our experience in testing websites for this Google Sniper 3.0 Free Download Bonus.

George has a specific ratio where he combines a certain number of niche-related articles with a specific word count, a specific keyword density, and a certain number of latent semantic index ("LSI") keywords. The combination of relevant articles, LSI keywords, and unique content really helps boost website ranking through on-page factors.

This is especially true after the recent Google algorithm updates (Panda and Penguin) where over-optimized backlinks created ranking disasters for many websites.

Adding income streams to your niche website is the final step in George's method.

If you follow the instructions in the manual and in the training videos, you will have a highly on-page optimized site with few suspicious or over-optimized back links.

Google will see unique content added over a period of 1-2 weeks as George suggests, and then once your pages are indexed and have a week or two for Google to spider, you can add sales offers or product offers within your articles.

George discusses finding the best offers in his manual and we were always able to find products to sell for every niche website we created in preparing for this Google Sniper review.

Google Sniper 3.0 PDF cost \$47. It's the same price with other make money online program such as : CB Passive Income Program \$47, Tube Launch Program \$29, Video Course No Cost Income Stream Program \$17, Paid Surveys At Home Program \$34... Google Sniper 3.0 PDF Benefits

Even if you are an existing webmaster, you can learn the new ways about keyword research and you can use this knowledge to do SEO on your existing website to improve them.

I have personally done that and it worked. It also keeps you in loop and constantly updated with the INFAMOUS Google Algorithm changes that can either make or break YOUR website.

Just like the Google 1) Penguin 2) Panda algorithms that had created havoc in the internet marketing world in 2011 and 2012.

But the biggest prize of all, Google Sniper 3.0 will teach you how to grow and EMPIRE of Google Sniper 3.0 PDF sites. Yes, it gives you the tools to quickly and sufficiently target a niche and keywords

of a product that WILL sell. Once you get a hang of the system, you can literally build a Sniper site within a day! Then it just needs to run the course of the Seep's (search engines), which you already would have done SEO on (search engine optimization) to get ranked quickly and to get Highly Targeted Traffic!! Conclusion

Google Sniper 3.0 Free Download Bonus is no different but in this case the pros out-weigh the cons and this system, if followed correctly will be a great investment and one that will produce the kind of online income that you are looking for.

Keep in mine also that most marketers, all be it the shady ones, use the old bait and switch technique to promote another product

They will often tell you that Google Sniper is a scam or list a bunch of complaints only to tell you about some product they claim is better.

You will see this with markers promoting products that are not as popular or are much more expensive

All I can say about marketers who use these methods, the product they are promoting should be good enough on its own and they shouldn't have to bad mouth other products to try and get more sales for theirs.
