### **RESIDENCY (1994 – 1997)**

I did my general surgical residency in the above mentioned institution which is recognized as one of the leading medical and post-graduate training schools in the country. I had the opportunity to do a wide variety of general surgical work initially under supervision and later (1996 –1997), independently. The trauma unit of this hospital is situated where expressways and railways converge into the metropolis of Mumbai (Bombay) with a population of 12 million. It is the busiest and best-organized trauma center in the country. I worked in this unit as a senior surgical trauma registrar for 6 months during my residency.

### **POST MASTER OF SURGERY EXPERIENCE**

1. I was working with **PROFESSOR DR. V. N. SHRIKHANDE** and **DR. A. G. NANDE** from **August 1997 to October 1998** and from **October 2000 to March 2001** in **SHRIKHANDE CLINIC** and in the **DEPARTMENT OF GENERAL SURGERY, BOMBAY HOSPITAL INSTITUTE OF MEDICAL SCIENCES, MUMBAI (BOMBAY)**.

SHRIKHANDE CLINIC, established in 1977, is a well-known referral center for management of Gastrointestinal problems. It attracts observers and trainees from all over the country.

BOMBAY HOSPITAL, established in 1949, is the largest multi-speciality private hospital in India with a capacity of 930 beds. It is recognized as a post-graduate training institution since 1992.

During this period, I was actively assisting in surgeries of the Pancreas (Puestows, Whipples, pancreatic necrosectomies), gall bladder, common bile ducts and the small and large bowel. I also assisted in Laparoscopic procedures such as cholecystectomies, inguinal hernias, funduplications, and appendectomies and learnt to perform Diagnostic Upper GI endocopy independently. I also continued my general surgical work in management of hernias.

2. I worked with **DR. PRAFUL DESAI**, former director and chief of surgical oncology of TATA MEMORIAL HOSPITAL, from **March 2000 to July 2000** in **Oncosurgery**, in BOMBAY HOSPITAL. In this department, I was trained in breast surgery, lower esophageal surgery and gastrointestinal surgery.
3. From **April 1<sup>st</sup> 2001 to July 31<sup>st</sup> 2001**, I was working as clinical fellow of **DR. P. JAGANNATH** in Gastrointestinal Oncosurgery, LILAVATI HOSPITAL, Mumbai. In this department, I was actively assisting Dr. Jagannath in major GI and hepato-biliary-pancreatic surgeries.
4. Since **August 1<sup>st</sup> 2001 to July 31<sup>st</sup> 2002**, I was working as a **clinical fellow** with **DR. P. JAGANNATH**, consultant surgeon, GI service, Department of Surgical Oncology – **TATA MEMORIAL HOSPITAL**, exclusively in **Gastrointestinal and Hepato-biliary-pancreatic cancer surgery**.

## **INTERNATIONAL EXPERIENCE**

1. **Internship training in Gastrointestinal and Hepatobiliary-pancreatic surgery at the MAYO CLINIC, ROCHESTER, MINNESOTA, USA, in September 1993 under PROFESSOR D. M. NAGORNEY.**
  
2. **From November 1998 to February 2000, I was a fellow in the Department of Visceral and Transplantation Surgery, University of Bern, Inselspital, Bern, Switzerland.** I worked under the supervision of **PROFESSOR M. W. BUCHLER** and **DR. HELMUT FRIESS**. Prior to further pursuing clinical surgery, I wanted to develop a scientific research background. In this department I worked as a fellow on various aspects of pancreatic disease such as **pancreatic cancer, chronic pancreatitis and acute pancreatitis. My main research topic involved tropical chronic pancreatitis.** In my 15-month stay there, I learnt various advanced techniques of molecular biology such as RNA extraction, Northern Blotting, RT-PCR, Western Blotting, immunohistochemistry and *In situ* hybridization. I was also attending the operation theatres and emergency duties. In addition to various gastrointestinal surgeries, I mainly observed and assisted in a number of pancreatic surgeries (Whipples pancreatoduodenectomies, Duodenum preserving pancreatic head resections) for which this department is world renowned.
  
3. **In August and September 2002, I was a clinical fellow in the Department of General Surgery, University of Heidelberg, Heidelberg, Germany, for 8 weeks.** I worked under the supervision of **PROFESSOR M. W. BUCHLER** and **DR. HELMUT FRIESS**. In this period, I was regularly assisting in major Biliary Pancreatic surgeries. Furthermore, I was actively assisting in a variety of colorectal surgeries.
  
4. **In 2005, I was the Warren Fellow of the IHPBA in the European Pancreas Center and the Department of Surgery of the University of Heidelberg, Germany.** In this time, I was working on the XIAP gene in pancreas cancer and gaining further experience in complex pancreatic resectional surgery.
