

1	NAS for broadcast 48TB (Network Attached Storage)	2650 euro	Current storage capacities are of only 2 TB space, which is enough for SD quality, but in case of transit to full HD will be enough only for one week
2	NAS for content archive 48TB (Network Attached Storage)	2650 euro	Current storage capacity for contents is of only 6 TB, which is not enough for a channel (as a consequence we periodically erase the archive)
3	NAS for brut archive 48TB (Network Attached Storage)	2650 euro	We do not have storage capacities for raw archive and keep it on different computers, which slows down considerably the work speed of image editors, graphic designers
4	NAS for brute materials 16TB (Network Attached Storage)	1320 euro	We do not have storage capacities for raw archive and keep it on different computers, which slows down considerably the work speed of the whole newsroom.

Total: 9270 euros
