Instagram also allows users to capture and exchange live videos, another content format that is extremely common on other social networks. The live feature introduced, Instagram implemented even more characteristics that could allow more viewers to engage or interact.

The live clip is an increasing phenomenon across a range of social media sites, so begin spinning when something exciting happens. Whether it's a birthday event for a squad, a personnel gathering or a nice animal, your dedicated followers want to see what you're up to every day.

## REGULAR POSTING

It's a nice concept to get a strong number of excellent posts up, perhaps 15 or so. Before you begin involving individuals and running this roster down. So when individuals check your website, they're going to see a complete photo display instead of just a couple, so they understand you're going to frequently post excellent material.

Your regular post will attract your followers, and gain new followers.
