Manager Man
Qualcomm
123 Qualcomm Way
San Diego, CA 92121

Dear Manager,

I am interested in the Software Engineering Internship at Qualcomm, as listed on Indeed. Please accept my attached resume as my application for the position.

My experience at the University of California, Riverside and MiraCosta Community College has provided me with structure and discipline that will carry over well into any workplace scenario. Specifically I have grown to seek out collaboration with peers and seek answers when problems come up. Some relevant courses include:

- CS061 Machine Organization and Assembly Language: discover the relationship between hardware and software, the decisions that can be made to develop a successful design, and relating the performance criteria that can be used to make such design decisions.
- CS113 Data Structures and Algorithms: implementation of complex data structures and group collaboration to implement algorithms that are efficient and provide the best runtime given specific data structures.

The current work and material I am including in this letter all attest to my solid record of initiative, responsibility, creativity, and professional dedication. I am an effective, collaborative, contributing member of any organization that I am associated with.

If you are interested in discussing my experience and capabilities further, please contact me at either the number or email above. I look forward to speaking with you.

Thank you for your consideration.

Sincerely,
Erica N. Lopez
