Please view my portfolio website here:

<http://otheweb.dev>

Hi, my name is Odis Barnett. I develop websites and projects using ReactJS for front-end development and NodeJs for backend development. I also develop and deploy static web applications too.

I am not a book of resources, but I love to learn new technologies every day. I also spend most of my days problem-solving and troubleshooting issues using every resource I have at my hands, things get done a result!

Authorized to work in the US for any employer

WORK EXPERIENCE

Personal Project (NETVINK)

Netvink

May 2020 to August 2020

<http://netvink.xyz/>

- Developed and deployed React-APP to a custom domain with favicon via Github Pages and NPM
- Created stylized components in separate module file to re-use across the entire webpage
- Created a dynamic page system to pull information from objects and display it in the DOM

Personal Project (CHATIDICE)

Chatidice

February 2020 to March 2020

<http://chatidice.xyz>

- Deployed server with NodeJS
- Use socket.io to get and store message information
- Used ExpressJS to send/handle HTTP protocol

Client Project/Freelance (TRULEY UNIQUE)

Truley Unique

September 2019 to November 2019

<https://truleyunique.com>

- APR 2020 - Revamped site for new products (Face masks and strap extenders)
- Developed and integrated all existing products into the new site

Personal Project (FOTOHANCE)

Fotohance

April 2019 to July 2019

<http://fotohance.xyz>

- Deployed ReactJS application with API from Unsplash
- Used JS to manipulate and change CSS properties of random image

Fotohance allows a user to edit image properties of a random image via API.

EDUCATION
