

Indev Consultancy

Nutrition Monitoring System for
Children

Features

- The product is developed using open source platform, so it remains affordable and adaptable in any scenarios. The application adheres WHO guidelines.
- Data collected, are integrated with GPS Coordinates with date & time forming a unit. The same can also be stamped on the photos.
- One mobile can collect more than one Anganwadi's (Early Child Care and Education Center) data
- The application is available in multiple languages, and can be adapted to any language with minimal effort. This makes the system a Multilingual Nutrition Monitoring System.
