## 1 SELECTION OF FABRIC

The First thing our tailors we do is to show the fabric for your suit. You can select the fabric as per your requirement and the money you want to spend.

## 2 TAKING PRECISE MEASUREMENT

After the selection of fabric. Our Tailor will take precise measurements of your body in which 15-20 different measurements will be jotted down.

## 3 STRUCTURING & CUTTING OF FABRIC BY DESIGNER

We cut the correct amount of fabric from the roll to ensure that all your garments are cut from the same cloth. The suit is then “bespoken for”, as the saying goes. Your chosen fabric is passed to the cutter, who is the architect and designer of your suit. He analyses your measurements and photographs and cuts an individual pattern, thereby laying the initial foundations of the suit.

## 4 TAILOR STITCH THE SUIT FOR THE REQUIRED SHAPE AND FORM

These cut pieces are then passed on to the master tailor (or coat maker) who gives the suit its shape and form.

## 5 FINISHER DO ALL THE HAND FINISHING TASKS

After this, the suit is passed to a seamstress or finisher, who does all the hand-finishing such as the button-holes, buttons, and buckles.

## 6 PRESSES WILL GIVE IT THE FINAL SHAPE

This process is repeated for the trousers (we have a specialized jacket and trousers tailors). The completed suit is then forwarded to the presser who gives the suit its final shape. The suit is then analyzed for quality control before we contact you to arrange your first fitting.

## 7 TAKING DELIVERY OF YOUR BESPOKE SUIT

At your first fitting, you will try on your suit in front of a tailor.

At this point, you will consult with the tailor on any further alterations that may be required – in order that the suit fits you like a glove.
