

# VPN FOR BUSINESS

[www.foxpass.com](http://www.foxpass.com)

# WHAT EXACTLY IS A VPN?

VPN is a service that allows you to leverage the benefits of a private network, even when you are in a public network. In other words, a VPN service exists between you and the web, thus masking your identity.

# **WHAT ARE THE BENEFITS OF A VPN?**

- **VPNs hide your identity on the web.**
- **VPNs make you anonymous to the target server.**
- **VPNs allow you to access geo-blocked content.**
- **VPNs help you access a target network through a protected connection.**

# TYPES OF BUSINESS VPNS

**Remote  
Access  
VPNs**

**Site-to-  
site  
VPNs**

**Private  
Internet  
Access.**
