

## CHART LOG - B

### Symbol Explanations

⑩ Top Ten Hit    ① Number One hit.

◆ Indicates that the record probably sold more than 250K. Only used on unsorted charts.

Unsorted chart hits will have no position, but if they are black in colour than the record made the Real Chart. Green coloured records might not have made the Real Chart. The same applies to the red coloured hits, these are known to have made the USA charts, so could have been released in the UK, or imported here.

### *Date of Entry*

The Charts were produced on a Sunday and the sales were from the previous seven days, with the exception of Christmas when no chart was produced. All sales from that week was carried over to the first chart of the new year. There are some Christmas period charts however, due to very high sales. The week beginning dates is used throughout and not the week ending one. So a date of 12 Jun 60 covers sales 5/6/60 to 11/6/60. The week ending would thus be for this chart 18/6/60.

⌚ Still in the chart on the final chart of the 31 December 2019. Those with this symbol might not have achieved their highest position and do not have a full sales total, plus it won't have completed its chart life.

### *Sales System*

⊙ Indicates sales of 250,000 to 499,999 copies sold while in the chart only.

▣ Indicates sales of 500,000 to 999,999 copies sold while in the chart only.

① Indicates sales of 1,000,000 copies sold while in the chart only. Another symbol will be added for each subsequent 1,000,000 copies sold. No indication is shown for sales inbetween each million copies sold after the first.

ⓘ This with one of the above sales symbols indicates accumulative sales from previous and present entry (re-entries only). Note not fully employed.

Sales symbols of some hits before the nineties are not included, due to the data not being processed yet.

The B.P.I. system of metal disc sales should not be confused with the above system of sales. Having said that the above sales measures were used in the seventies, by the B.P.I., though anyone can have a 'metal' disc done for any number of sales quite legally. The lower category of B.P.I. sales (200,000) does not apply here. Of course this does not mean that a record did not sell that figure and acts should not be disappointed if that is the case. All other B.P.I. categories are covered by the above.

### *Format*

Record company labels and numbers are not listed. This is because the original recording released in the U.K. may not be the one that was sold in some cases and it would be misleading to list, say, the CD number, when the track may have sold more on cassette. No format rules apply and all types were included from the point of first sales and until they became obsolete, such as the 78! Since the emergence of downloads the AA single has

become a problem, since each track can sometimes be released as a separate download. However if it is known that a track is being released on 'hard copy' as a AA side, then the tracks will be grouped as one, or as soon as known.

For the above reasons many remixed songs are listed as re-entries, however if the title is altered to reflect the remix it will be listed as would a new song by the act. This does not apply to records still in the chart and the sales of the mix would be added to the track in the chart. This may push singles back up the chart or keep them around for longer, nevertheless the chart is a sales chart and NOT a popularity chart on people's favourite songs or acts. Due to encryption decoding errors some artists/titles may be spelt wrong, I apologise for any inconvenience this may cause.

The chart statistics were compiled only from sales of SINGLES each week. Not only that but every single sale no matter where it occurred! Format rules, used by other charts, were unnecessary and therefore ignored, so you will see EP's that charted and other strange records selling more than other charts. Bear in mind that some singles were not released in Britain and as long as they were classed as SINGLES they count if sold here. Many pirated singles were bought by the public and they have been counted along with the rest. Unless they didn't work! Cassette Singles were easy to copy and you wouldn't know the difference if it was copied on to cassette from CD. This Chart counted them. After all a sale is a sale no matter who buys it, well not really if it's bought by the record company that's a cheat, so this chart ignored them and also stolen copies from the shops. Copying is illegal and it's killing the Music Industry, and it's growing from 1997 the REAL CHART started counting more fake (home made in some cases) CD singles being sold to other people. It detected vast sales of so-called limited edition ones too! Then there are records which should not even be in the shops still being sold. Illegal downloads count too, but only if they occur a fee (even if it is hidden). FREE downloads again do not count, nor does streamed music, or Radio Airplay. Karaoke tracks are generally excluded. And spoken word is never included, unless it over music and could be classed as a music track.

### *Chart dates*

The compilers did the first chart on Sunday the 11 January 1948 it also included the sales for the 4 January too! It was a top 40 and was only 78 rpm records at that time. It stayed a top 40 till 3 January 1960 when it became a top 100 and has stayed that way since. It's interesting to note that the 3/1/60 top 100 only included sales for the previous 7 days and top 40 sales figures for the missing week. This was to balance out the top 40 in the new top 100 and not allow the outsiders (of the top 40 in the missing week) of the previous week a boost into the 40, due to two weeks sales.

### *Artist information*

Most of the information comes from Google or Wikipedia.

### *I would like to thank the following:*

Record Mirror, Music Week, Smash Hits, Number One, Melody Maker, N.M.E., Music papers, who have made it easier to compile these chart logs (mostly spelling names). Special thanks to the chart compilers themselves, for giving me solo access to the chart information and letting me explain the system they use.

Chris Barber's Jazz Band

British male/female instrumental group, led by Chris Barber (born Donald Barber, 17 April 1930). Lonnie Donegan was an early member, but the hitmaking lineup in 1959 was Barber, Graham Burbridge, Pat Halcox, Ottillie Patterson, Dick Smith, Eddie Smith, and Monty Sunshine. By 1962, Sunshine had left and been replaced by Ian Wheeler

Brigitte Anne-Marie Bardot is a French actress, singer, dancer and fashion model, who later became an animal rights activist.

66 Mr Sun .....

The Bar-Kays

American male group that has gone through a lot of line up changes. In 1967 (when they were Otis Redding's backing band) the band was James Alexander, Ronnie Caldwell, Ben Cauley, Carl Cunningham, Phalon Jones, and Jimmie King. Redding, King, Caldwell, Jones and Cunningham all died in a plane crash in December 67. By 1975, the line up was Alexander with Charles Allen, Mike Beard, Larry Dodson, Harvey Henderson, Lloyd Smith, Winston Stewart, Frank Thompson and Michael Toles, while by the mid-80s Mark Bynum had replaced Charles Allen.

## Bay City Rollers

*Scottish pop band. For a relatively brief but fervent period (nicknamed "Rollermania"), they were worldwide teen idols. The group's line-up featured numerous changes over the years, but the classic line-up during its heyday included guitarists Eric Faulkner and Stuart John Wood, singer Les McKeown, bassist Alan Longmuir, and drummer Derek Longmuir.*

Mel Blanc

Melvin Jerome Blanc (May 30, 1908 – July 10, 1989) was an American voice actor and radio personality. After beginning his over-60-year career performing in radio, he became known for his work in animation as the voices of Bugs Bunny, Daffy Duck, Porky Pig, Tweety Bird, Sylvester the Cat, Yosemite Sam, Foghorn Leghorn, Marvin the Martian, Pepé Le Pew, Speedy Gonzales, Wile E. Coyote, Road Runner, the Tasmanian Devil, and many of the other characters from the Looney Tunes and Merrie Melodies theatrical cartoons during the golden age of American animation. He voiced all of the major male Warner Bros. cartoon characters except for Elmer Fudd, whose voice was provided by fellow radio personality Arthur Q. Bryan, although Blanc later voiced Fudd, as well, after Bryan's death.

## David Bowie

*David Robert Jones (8 January 1947 – 10 January 2016), known as David Bowie was an English singer, songwriter, multi-instrumentalist, record producer, painter, and actor. He was a figure in popular music for over five decades, and was considered by critics and musicians as an innovator, particularly for his work in the 1970s. His career was marked by reinvention and visual presentation, and his music and stagecraft significantly impacted popular music.*
